EDUCATION

Babcock University

Bachelor of Science (B.Sc.) in Computer Science

Nigeria

Expected July 2026

EXPERIENCE

Providus Bank

Software Engineer Intern

Lagos, Nigeria

2025 – Present

- Collaborated with the Application Development team on the design and development of the bank's card management application.
- Assisted in building and enhancing the Notify application, contributing to functionality and user experience improvements.
- Participated in software design discussions, feature implementation, testing, and debugging activities.
- Worked within an agile development environment alongside cross-functional teams to deliver business-critical solutions.

PROJECTS

SmartBallot (Online Voting Platform) | React.js, Tailwind CSS, Node.js, Express.js, MySQL, JWT

- Designed the database with structural anonymity and strict 3NF normalization, separating user identities from votes to ensure referential integrity.
- Mitigated "Timing Correlation Attacks" by implementing time bucketing, storing votes in rounded time blocks instead of high-precision timestamps.
- Implemented secure, scalable, and stateless authentication using JSON Web Tokens (JWT) and Bcrypt hashing.

Éclat (Luxury Watch E-Commerce Platform) | React.js, Tailwind CSS, Supabase, PostgreSQL, Context API

- Engineered a 'content-first' e-commerce platform for luxury watches, powering real-time product data pipelines using Supabase and PostgreSQL.
- Developed a custom global state management system via Context API for the cart, utilizing advanced filtering logic for a performant user experience.
- Implemented secure user authentication and order tracking workflows utilizing Supabase Auth to ensure robust protection of customer data.

Guardian (SOS Emergency Response System) | React, TypeScript, Vite, Tailwind CSS, shadcn/ui

- Engineered a client-side web application for personal safety that instantly captures high-accuracy GPS coordinates via the Geolocation API.
- Integrated native OS-level SMS deep links to route localized distress signals and securely stored medical profiles directly to emergency contacts.
- Designed a highly accessible, mobile-first interface using Tailwind CSS and shadcn/ui components to facilitate rapid interaction during high-stress scenarios.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, C#, SQL, C++

Frameworks: React, Next.js, Node.js, Express.js, .NET Core, Tailwind CSS

Tools: Git, Docker, Vite, Vercel, Figma, Supabase, Firebase, MySQL

Strengths: Full-Stack Web Development, REST API Development, Database Design, Responsive UI/UX Design, Agile Collaboration, Problem Solving, Teamwork and Communication
